

## REAR

The machine is also available in rear version, enabling a controlled rear access

to the machine for cash loading and bag collection.

The CIT doesn't interfere with the branch activities.

## ASSISTED SELF-SERVICE

A new way to do bank: a perfect fusion between the classic TCR and the ATM which allows to move up again the customer inside the branch. In this way, besides achieving lower management costs, thanks to the technology, you get more contact opportunities with customers and thus more possibilities of commercial developments.

WITH THE UTMOST EASE OF USE AND THE MINIMIM FOOTPRINT, CASHERE ALLOWS:

- The direct use of the customer
- New role of the cashier: from accountant to consultant
- Recycling of banknotes and coins (deposit, withdrawal and change of denominations)
- Compliance with article 6 framework for banknotes
- Counterfeit detection for coins
- Cheques deposit
- Utility payment
- Collection and transport of banknotes in disposable stacking bag
- Collection and transport of coins in canvas bag
- Possibility of TTW installation

## SOME TECHNICAL SPECIFICATIONS:
