

CDS803

COIN DEPOSIT AND RECYCLING SYSTEM

CIMA
WHEREVER YOU COUNT

CDS803

Coin recycling unit with high capacity and high performance. It's the ideal solution for big retailers and for all the users who need to handle high volumes of coins. It drastically reduces the time spent in the back office for the preparation of the daily float and for the cash collection at the end of the day and, through online connection, optimizes the retail/bank/CIT cooperation.

Along with the SDM504 or the AST7008 (banknote recycling devices), it allows a complete management of the cash process.
