

CDS804

HIGH CAPACITY COIN RECYCLER

CIMA

WHEREVER YOU COUNT

CDS804

HIGH CAPACITY COIN RECYCLER

The **CDS804** is an all-new high capacity, high performance coin recycler from CIMA. It's the perfect solution for high volume retail, gaming and hospitality environments. With its flexible sorting and dispensing options, it would suit in vending depot environments too. When used in conjunction with one of our industry leading note recyclers, the solution significantly reduces time spent on float preparation, end-of-day cashing up and reconciliation.

The **CDS804 FULL** is an additional configuration that allows single denomination bulk dispense of coins into bags without having to open the safe area of the machine. It allows also the traditional overflow function. Each bag can hold up to 8kg. In coin intensive environments, this feature reduces frequent CIT visits to remove surplus coins.

CDS804 Features:

- Deposit speed: 10 coins per second (mixed coins)
- Dispense speed: 45 coins per second
- Input tray capacity: 1,000 coins (mixed)
- Recycling capacity: 40,000 coins
- 9 x coin hoppers
- 1 x €0,01; 1 x €0,02; 1 x €0,05; 1 x €0,10; 1 x €0,20; 1 x €0,50; 1 x €1; 1 x €2
- Up to 5 x recycling denominations
- Compatible with CAOS and C-Link

CDS804 FULL Features:

- Storage pickup (CIT): 6,000 coins in a tray
- Total capacity: 46,000 coins
- External overflow in plastic bags - 8kg

Optionals:

- Customizable coin till on request
- High capacity mixed coin till (no compartments)
- 15" PC/touch screen
- 3" thermal receipt printer on a bracket

Capacity may vary according to value
